## CAVIAR

### IMPERIAL OSCIETRA

Found in China and Russia, Amur sturgeon can live more than 30 years. The largest individuals can grow to over three metres and weigh more than 190kg. This long-lived fish only starts to produce its characteristic large grey to emerald coloured eggs at the age of ten.

**SPECIES:** Acipenser Schrenckii

**ORIGIN:** China

**CHARACTERISTIC:** A pure, full-bodied flavour with a hint of fruity freshness, that settles in a long-lasting note on the palate.

## ROYAL AMUR

One of the most popular caviars among Michelin-starred chefs around the world, this caviar is produced by a Kaluga hybrid sturgeon (Acipenser schrenckii x Huso dauricus). The large firm pearls are grey to golden brown in colour, and rolls between tongue and palate to release very complex flavours.

**SPECIES:** Acipenser Schrenckii x Huso Dauricus

**ORIGIN:** China

**CHARACTERISTIC:** Distinctive floral aroma with the hint of the ocean.

# PASTA, RAVIOLI, GNOCCHI & RICE

Pasta has been produced in Gragnano for over 500 years. For La Fabbrica de la Pasta, producing pasta is an art, performed every day following the same traditions as their ancestors. A unique mix of history, culture, traditions, and of course ... secrets! La Fabbrica de la Pasta's ancestors used to mix only two ingredients: high-quality durum semolina and water from the natural spring in Gragnano's mountains. The ingredients were then pressed through a bronze die, and the pasta was dried in the town's streets under the sun. Today, after all these generations, La Fabbrica de la Pasta follows exactly the same traditional methods!
